**The room**

The washroom is a fundamental part of any public building, be it office buildings, hotels, railway stations or airports. The wall hung accessories that d line offer are simple and based on the following qualities; impeccable design solutions, intrinsic functionalism and installation techniques developed through years of invaluable experience. Hygiene and maintenance are prevalent concerns in the product’s design phase. Both installation and maintenance is easy and that is paramount, especially for commercial use.

**The products**

The products in d line’s wall hung series were specifically designed for the high traffic segment, such as airports and train stations. Public buildings and places with heavy traffic.

The d line wall hung series includes holders, dispensers, bins, driers and various holders. All products are decorative with the added feature of servicing and refilling made easy. Like all d line products, longevity is a focal point and great care has been taken to ensure the „shelf-life“ of this line in particular. All products are designed and made for frequent use.

The wall hung range is based on the aesthetics of minimalism and has been developed in accordance with the tradition of the structural simplicity inherent to Danish design. Strength, endurance and functionalism play an integral role in our product development and in the overall shape and character of the products. In keeping with the high technical standards of the design phase and an unrelenting dedication to advances in engineering, these qualities continue to raise the bar and thus the d line series to a level of timelessness.

**The material**

All wall hung accessories are manufactured in marine quality stainless steel. The high humidity level in the bathroom setting necessitates the use of a non-corrosive rust resistant stainless steel. On d line’s behalf, FORCE Technology in Copenhagen has conducted a variety of independent tests on different metals’ resistance to rust. As a result of these tests, the only metal used in d line’s bathroom fittings is AISI 316, also known as marine quality stainless steel. AISI 316 is one of the strongest and most resilient alloys on the market today.
Cleaning, care and maintenance
Stainless steel is easy to clean. Washing with soap or a mild detergent and warm water followed by a clean water rinse is usually quite adequate for domestic and architectural equipment. An enhanced appearance will be achieved if the cleaned surface is finally wiped dry. Specific methods of cleaning may apply and if so instructions will be provided.

Design continuity
From the perspective of design, d line conceptualises its products in terms of an interrelated continuity. The quality standard is revealed in each and every product, from soap dish to towel rack to waste bin and Papierhandtuchspender. In the words of d line’s head designer, Knud Holscher:

“There is a certain implicit advantage in having an architect work within the field of industrial design. Architects view the individual design product within the scope of the architectural space that it is meant to occupy. I perceive architectural space as a whole, where the bathroom is an equal and, most importantly, an integral part of the building.”

The Bank
Owner      Kroonenberg Group
Builder    Midreth BV
Architect  Rijnboutt Architecten
Client     Intermat Mijdrecht
Country    Netherlands

The Bank was built between 1926 and 1932 and was the first ABN Bank in Amsterdam. The design of this typical example of solid stateliness was in the hands of architects B.J. and W.B. Ouëndag, as well as the founder of the Amsterdam School of Architecture, H.P. Berlage.

The Kameha Grand
Interior designer Marcel Wanders
Size       19,000 sq.m
Architect  Karl-Heinz Schommer
Client     Lifestyle Hospitality & Entertainment Group
Country    Germany

The Kameha Grand Bonn opened in late autumn 2009; it has 254 rooms, including 62 suites and a flexible partitionable conference or ballroom that can accommodate up to 2,500 guests. The Kameha Grand Bonn has won the prestigious MIPIM Award and the international Real Estate Industry Award. The hotel impressed tradeshow visitors and the jury in the category “Hotels & Touristic Resorts.”

Bella Sky Comwell Copenhagen
Owner and developer Bella Center
Architect  3XN
Floor area  42,000 sq.m. (814 rooms / 23 floors)
Country    Denmark

Bella Sky Comwell is a four star conference hotel, adjacent to Bella Convention & Congress Center in the Ørestad district of Copenhagen. With 814 rooms, it is the largest hotel in Scandinavia. Consisting of two asymmetrical towers, the hotel’s form depends on the vantage point. The towers are distinguished by a dynamic and graphic skin of triangular panels, and even from a great distance, the slightly pixelating effect is visible. The lobby merges into the entrance of the Bella Center and causes a twist of the ground floor, lending the hotel a dramatic street presence.
